BRIEF ABSTRACT OF LETTER.

Appointment of Foreign Agents
for Purchase of Materials
to be imported from England
and foreign Countries.

Letters from

(1). Messrs Edward Le Bas & Co,London (through C.T.Evennette Esqr.,)

(2). The Railway & Works Company Ltd London.(through -J.S.Middleton, Dorking).

offering themselves to act as agents for the purchase of materials to be imported from England and foreign countries.

****

It is understood that Railway Adminstrations and large firms like Messrs Tata & Sons have similar agents. The firm of Messrs Jeremiah Brothers has been mentioned as one of those who would do business for us.

I shall be glad if the Financial Secretary will put up a note in consultation with the Railway Secretary, P,W. Secretary, Mr. Beames and Mr. Chatterton on the subject. The firm may be authorized to obatin tenders and send them for approval. They should be responsible that are for the goods sent out according to the specifications, etc. given and that they are landed in proper condition.

Considering the large quantities of material that we have to import in connection with the Railways, Public works and Electric installations, it seems to me that the question of making the best arrangements possible to secure materials of first rate quality at the cheapest price should be thoroughly considered.

Rec'd 16/12/13

Dorking
2nd October 1913

To
Visvesvaraya Esqre C.I.E.
Dewan to His Highness The Maharajah of Mysore
Bangalore

Sir

I learn from my son H. D. Middleton of Cadamanay who I understand had an interview with you a short time ago on Railway matters, that the Mysore Government contemplate appointing an Agent in London for the purchase of anything required for the construction of your Railways.

I venture to suggest to you that the Railway and Works Company and R. W. Wright are well qualified for such a position, as owing to their long and extensive connection with the manufacturers they could get you everything required on the very best terms.

Mr. Wright is an Engineer of large experience and would be most useful in selecting suitable Engines and Rolling Stock which I presume would be a most important point in the business.

Under these circumstances I cannot but think

You would be consulting the interest of the Government of Mysore by appointing these Gentlemen to the position.

Apologising for troubling You in this matter as I am the oldest European Settler in West Mysore, and greatly interested in the success of the projected Railways. for the present advanced and promising condition of which I cannot but think we are largely indebted To Your good offices.

I have the honor to be

Sir

Your most obedient Servant

V. D. Middleton

CONTRACTORS:
THE RAILWAY & WORKS COMPANY, LIMITED,
AND R. W. WRIGHT.

Telegraphic Address:
CUTBILL, LONDON.

37, Old Jewry, E.C.

London, 2nd October, 1913.

M. Visvesvaraya, Esq.,
Dewan to H. H. The Maharajah of Mysore,
B a n g a l o r e, INDIA.

Sir,

Having been advised that the Mysore Government contemplate the construction of Railways from Mysore City to Hassan and from Arsikere to Hassan and on to Saklaspur and Mangalore, we entered into communication with Mr. Herbert D. Middleton of Cadamaney with the view to his proceeding to Bangalore and making application for Permission of this Company and Mr. R. W. Wright to tender for the Construction and Equipment of the Lines in question when the time arrived for dealing with the matter.

We now understand that some portion of the work is being constructed departmentally, and that the same course will probably be adopted with regard to the rest of the work.

In the event of the Government appointing Agents in England for the purchase of Engines, Rolling-stock, Materials, etc., we would like to make application for the position, and we have every reason to believe, from an intimate knowledge of all classes of railway material and large dealings with

2/10/1913. 3

the various Manufacturers and being closely associated with a London Shipping House, we should be able to discharge expeditiously and with care all duties entrusted to us.

We have the honor to be

Your most obedient Servants,

FOR AND ON BEHALF OF
THE RAILWAY & WORKS Co. LD. & R. W. WRIGHT

Pch. No 1987

10th December 1913.

From,

Messrs. Edward Le Bas & Co.,

Dock House, Billiter Street,

L O N D O N, E.C.

(per C. T. Evennette Esq,

a Representative at present travelling in India)

To

M. Visvaraya Esq, B.A., M.I.C.E., C.I.E.,

Dewan of Mysore.

Sir,

With reference to my interview with you in the interest of Messrs Edward Le Bas & Co., of Dock House, Billiter Street, London E.C. (whose world-wide travelling representative I am at present) who are general engineers' merchants in Iron, Steel, Hardware and Machinery of every description, and who maintain a special brandh for the supply of general goods for clients abroad, in accordance with your kind suggestion, I now beg to place before you formally and officially the proposal I had the honor of making to you verbally, for favor of consideration of the Mysore Government.

I suggested that as the Government has no general -ly accredited buying agent in Great Britain for articles - required to be imported for use in the state of Mysore, but obtains directly quotations and supplies from various sources according to the requirements, that, obviously, each supplier tries to obtain the highest possible price for supplies on each occasion, since the transaction is one of a completed nature in each case and, probably, in several cases the transaction is a minor one from a monetary point of view.

Most suppliers of any importance maintain agencies either direct or by means of correspondents. Whenever such are maintained the prices quoted to India, even when direct quotations are obtained from head quarters, always

include a covering commission for the local Indian Office or correspondent. To enable this to be done suppliers have aminimum quotation price. For this reason, so as to be able to quote lowest terms, Messrs. Edward Le Bas & Co, have no agents.

When however a London merchant dealing general-ly with all foreign markets (such as Edward Le Bas & Co.,) places an order, the country of destination is not stated- Messrs. Edward Le Bas & Co. attending to their own shipping business themselves- consequently, manufacturers, who are largely dependent upon the goodwill of shipping merchants, give them a lower quotation than is ever quoted to consumers -governmental or others- it being recognised that merchants are a necessary medium of business generally for manufac-turers.

If the Mysore Government obtained a large amount of supplies through one source, i.e. an accredited agent whose duty it would be to secure quotations from wide sources without disclosing the Mysore Government's name, that agent would be able to secure the most favourable prices.

The agent should give the Government credit for all trade discounts and would be recompensed by the State at a stated regular percentage to be agreed upon. This agent would also look after shipments generally even when supplied other than directly, pass goods and see that, when purchase has been made at f.o.b. prices, Home ports, they were shipped by cheapest and most expeditious routes and lines of steamers.

Messrs. Edward Le Bas & Co., maintain a large fully qualified expert staff with business extending through-out the world. It is not a conservative company, in that it is in friendly relations with the world's markets and equally willing and able to supply on the most favourable terms the products of any nation to consumers.

Messrs. Edward Le Bas & Co. would be glad to

(1) Either become subsidized accredited agents to the Mysore Government for commercial matters generally, including affording every assistance to the Government and its people generally, for an annual fixed subsidy and to maintain a separate department for the same,

or

(II)To become accredited agents to supply materials as herein suggested at a small fixed percentage on invoiced costs. They would be prepared to quote for materials either F.O.B. England or C.I.F any Indian port f or F.O.R. delivered at nearest Railway Station.

If the Mysore Government agreed to some such agreement I am convinced that, although it will be apparent I am prompted by desire to increase Messrs. Edward Le Bas & Cos business by those proposals, it will be of immense advantage to the State, resulting in actual savings over present expenditure; since unlike a casual supplier, the benefit to - Messrs. Edward Le Bas & Co in the aggregate, in satisfying all the requirements of the Mysore Government would make it much more worth that company's while to see that every satisfaction is obtained, than actuates a casual supplier who looks upon each transaction as completed and out of which he quite legitimately seeks to make the greatest immediate profit.

My duty is simply to initiate these negotiations and should the.Mysore Government be pleased to continue them with a view to agreement being reached, will they please do so direct with Messrs. Edward Le Bas & Co. to whom I am sending a copy of this letter, at the same time I shall be glad to journey to Bangalore again to further discuss matter personally if required and anything useful is likely to result therefrom.

My postal Indian address is c/o Messrs. Thomas Cook & Son, Old Court House St. Calcutta for the next two months while travelling in India.

I would be obliged if you will favour me with an acknowledgment and some expression of opinion to myself.

I have the honor to be,

Sir,

Your most obedient servant,

L. Everette

GPB—55,000—27-4-09

Railway Secretariat. | G.P. File No. 189 of 1913.

Serial No.

I do not think I have much to add to the various notes I have already written on this subject, copies of which are attached. There has however, been one development in the method of importation of railway stores since I last noted. For the importation of English stores for railways, I was originally in favour of appointing Agents in England and suggested some firm of Engineers who have a large Indian connection such as Messrs. Rendel Palmer and Tritton, because I was of opinion that the only good alternative method, namely, of utilizing the Madras and Southern Mahratta Railway administration would prove more expensive than having our own Agents in England. However on a reference being made to the Railway Company, they offered to get out our English railway stores for a commission of 2½% to cover specification inspections and agency. As these terms were exactly similar to the terms quoted by Messrs. Rendel Palmer and Tritton and as there appeared to be certain advantages in dealing with the Madras and Southern Mahratta Railway, these terms have been accepted and an indent for permanent way and rolling stock has been sent to the Board of Directors for necessary action. In sanctioning the forwarding of this indent however Government have stipulated that the Board of Directors of the Madras and Southern Mahratta Railway should send out the tenders received

GPB—1,500—8-12-12

Railway Secretariat. | S.F. File No. 38 of 1913.

Serial No.

so that Government can decide out here which tender to accept, and thus in my opinion the principal advan-tage of dealing through the Madras and Southern Mahratta Railway Company is lost viz., the saving of the 3 weeks' delay which occurs in sending tenders out here for acceptance by allowing the Board of Director to settle tenders in the same way that they would for their own railway material.

As things stand however, the Board of Director appear to be the 5th wheel of the coach, because their Consulting Engineers (also Messrs. Rendel Palmer and Tritton) draw up the specifications and do the inspections, and they might just as well send the tender received and their recommendations as to acceptance direct to us and so save delay. The whole question has however, now entered on another stage, since it is proposed to have one agency through which English stores for all departments should be obtained.

I doubt whether the Board of Directors would undertake other than railway work and for this reason as well as the one quoted above, I think it will be advisable that the Mysore Durbar should have their own agents in England.

Now as regards the class of agent required, I strongly recommend the appointment of a firm of Consulting Engineers instead of such firms as -

GPB—1,500—8-12-12

Railway Secretariat. | S.I. File No. 187 of 1913.

Serial No.

Messrs. Edward Le Bas & Co., who are general merchants, or The Railway and Works Company who are Contractors.

The great bulk of our imports will be engineering material and it will be necessary in any case to have a firm of Consulting Engineers to draw up specifications, designs, inspect supplies during manufacture and after completion etc. The preparation of designs and specifications is a special branch of Engineering in which firms of Consulting Engineers in London, and of course, elsewhere, are experts and which could not be satisfactorily carried out by indenting officers out here, who have, generally speaking, had little experience of this class of work. It is therefore in my opinion advantageous to employ such a firm of Consulting Engineers also as our general agents for obtaining and forwarding all our stores.

The following firms were addressed by me in July 1912 and they all expressed their willingness to carry out such agency work:-

Messrs. Wolfe Barry and Partners.
" Rendel, Palmer & Tritton.
" Robert White.

GPB—1,500—3-12-12

Of these, I would recommend ~~xxxx~~ Messrs. Rendel

22

N.O. No: 19 Encl. Rechin. 21/22. 1. 14

Forwarded, with compliments, to the Secretary to Government, Public Works Department.

L. A. Bell

Memo No. 16 Dated P.W.D 24th January 1914.

Note No.103 dated 25th January 1913 from the Secretary to the Government of Mysore for Railways, to the Dewan of Mysore.

****

SUBJECT:- English stores required for the new railway lines proposed to be constructed in Mysore.

REFERENCE:- (a) Letter No.123 dated 31st July 1912 from the Engineer-in-Chief, State Railway Construction Department.

(b) Letter No.518/Fl.4 dated the 31st October 1912 from the Engineer-in-Chief, State Railway Construction Department.

With the first letter the Engineer-in-Chief forwarded a note describing 3 methods by which English Stores required for railway work might be procured, and suggested, inter alia, that certain firms in England should be asked whether they were prepared to act as Agents to the Mysore Government for the purchase of stores direct from England and, if so, to state their terms.

2. In this note no preference was given for any one method over any other but it was stated that probably the 3rd method (direct from England) would prove cheaper than the other two.

3. The late Secretary verbally agreed to the English firms therein referred to being addressed and with the second letter the Engineer-in-Chief forwarded the replies received and recommended, in the event of this system being adopted, that Messrs. Rendel and Robertson should be appointed as home agents.

4. On this the late Secretary issued certain orders to the Under Secretary and the latter has prepared a note comparing prices of obtaining rails,

I. Through Agents in England,
II. Through the Madras and Southern Mahratta Ry.Co.
III. Through Messrs. Tata & Co

5. Unfortunately the rates quoted against II are taken from the Mysore Hassan project estimate and are 2 years old and now of no value.

6. It is probable however, that the book rates of material obtained from the Madras and Southern Mahratta Railway Company would be no higher than the cost of the same material if ob--tained through our own home agents less their commission.

7. All railways out here however charge 10% on the book rates in the case of sales to other railways to cover store establishment, direction and home charges, including Consulting Engineers fees, etc., and there is no reason to suppose the Madras and Southern Mahratta Railway Company would waive these charges if they supplied us with new stores and assuming the cost of our home agent's charge at 3%, there would be a loss of 7% in obtaining stores in this way, and it is not recommended.

8. In the case of I and III, the quotations obtained were both of June 1912 and therefore comparable and the Under Secretary's statement shows a saving of Rs.760/- per mile of track in favour of III over I, but in this no allowance is made for the cost of inspection in the case of III.

9. The quotation of Rs.112/- per ton f.o.r. Bangalore was also one made to Sir Vithaldas Thackersey for the Bangalore-Chickballapur Light Railway Company and might possibly not be repeated if the Mysore Government asked for a quotation, as there appears to have been something personal about it. - - (Perhaps Sir Vithaldas is interested in both Companies).

10. With regard to Rolling Stock, Station Machinery and Girders the Under Secretary has not been able to make any comparison, but I know from my own experience on State Railways that as regards Goods stock and Girders, those manufactured in this country are not only more expensive but not so well turned out as similar material obtained from England.

11. Locomotives, of course, cannot be manufactured in this country and it is only a question as to percentage of profit charged, which would, I think, be in favour of getting them through home agents, and the same remarks apply to all tools and plant wanted either for construction work or open line, such as pumps, boilers, turntables, water columns etc.

12. It will be seen from the foregoing that I am in favour of having home agents. The greatest drawback, in my opinion, to obtaining stores in this country is that one has to take them as one finds them. One has no guarantee except the maker's name and the minute inspection, not only of finished articles, but of their manufacture and of the raw materials, that is possible and usual in England is practically impossible out here.

13. I would make a reservation in the case of rails and fish-plates obtained through Messrs. Tata & Co., if the Railway Board will permit us to use their inspecting staff, as I feel sure they will. Appointing home agents moreover, would not bind us down to get <u>all</u> our stores through that agency and if we found at any time that it was cheaper and better to place an order in this country, we should be at perfect liberty to do so. For this reason I would demur to paying any fixed allowance, and would would suggest a percentage payment only, under which we should have a free hand to place our orders where we liked.

14. I am of opinion that Messrs. Rendel and Robertson are probably the best firm to deal with and I would suggest that they be informed that the Mysore Government do not care to pay any fixed salary, but prefer to pay a percentage to cover everything and ask if they can make an offer on this basis, at the same time informing them that previously Mr. Houston Stewart acted as home agent to the Mysore Government at a commission of 2% on the gross English charges.

****

22/1/14

Under Secretary for Railways,
Government of Mysore.

I shall feel favoured by the Financial Secretary kindly giving me his opinion on the proposals of the Secretary for Railways. Even if we should entrust the purchase of English stores to a firm in England, I think that we must either have a local firm in addition, who will hold themselves responsible for the delivery of the Stores in good condition in Mysore or the English firm should guarantee us against loss, if any, arising from the stores arriving in a damaged condition.

Intd/- M.V.

Government of Mysore.

ENGLISH STORES FOR RAILWAYS.

The Railway Secretary's note assumes all through that the Madras and Southern Mahratta Railway Company will demand 10 per cent on book rates. This is an important point on which definite information may perhaps be obtained.

2. The advantage of getting our stores through the Madras and S.M.Co., are:-

(a) The Company is in business relation with us as the working company of our lines for many years past and it would be better for us to deal with it than with a new firm of home agents.

(b) The working of most of the lines on which the stores will be issued may go at least for some time to the Madras and S.M.Co., and the company will therefore be interested to some extent in the quality etc., of the stores supplied. If home agents are appointed their connection with the supplies will practically cease after the stores are received and used. The Madras and S.M.Ry.Co., on the other hand will always be here to refer to if anything goes wrong at any time.

(c) Obtaining stores through the Madras and S.M.Ry.Co., will combine the advantages of having home agents as well as a local firm to look after our interests.

It can perhaps be arranged for us to draw on their balances of stores for whatever is available; for other articles indents may be timely sent by the company along with its own requirements. Dealing through the stores of a large railway near at hand will save delay and inconvenience in many cases.

(d) As regards rates, if we purchase through the Madras and S.M.Ry. Co., we can always be certain of not having to pay higher rates than the company itself pays for large purchases of a similar kind. If we have to deal with tenders called for by

Home agents on our behalf we can of course check by figures obtained from other sources but the check will not be so easy or automatic.

(e) By obtaining our stores through the M. S. M. Ry. Company we may perhaps secure the concession rates for freight usually allowed on railway stores by the Railway companies from the port of importation to the Depôt.

(f) The cost of maintaining large store Depots will be saved. We may draw stores in moderate quantities from the Company's stores as required for use.

3. For these reasons I venture to suggest that it is worthwhile to try and arrange for the supply of construction stores for our lines through the Madras and S.M.Ry.Co. The fact that that company and the Mysore Government maintain joint stores for working purposes may be urged as entitling the Mysore Government to the help of the company in this matter.

4. Of course 10 per cent on book rates is too high even for all the advantages mentioned above. But if we are freely allowed to utilize the Company's stores and if we get the freight concession we may perhaps agree to 5 per cent. The exact percentage can only be settled after we know the exact process that will suit the company as regards payment, custody, delivery &c.

5. It is also desirable in this connection to address the important firms in Bombay and Calcutta who deal in this line and enquire under what arrangements they can obtain the stores we want. These firms in India are generally agents to foreign firms and the cost of articles obtained through them under special arrangements may not exceed the cost of similar articles imported through Home agents. In any case there is room for enquiry and comparison. As for inspection during manufacture and passing stores and arrangement for shipment the Indian firms will no doubt undertake to make arrangements to our satisfaction

6. If suitable arrangements cannot be made with the Madras and S.M.Ry. Company or any firm in India then Home agents will have to be appointed. A non-committing enquiry may, therefore, be made of Messrs. Rendel and Robertson as suggested in para 14 of the Railway Secretary's note of 24th/25 January 1913. By the time their reply arrives, the result of the enquiries suggested in paragraphs 3 and 5 above will also be known and there will be materials enough to arrive at a decision.

7. As suggested by the Railway Secretary we should have a free hand to place our orders where we like even if we employ home agents or agents in India on Commission. The rates of tenders called, the agents will have to be carefully compared with rates obtained from other sources before orders are finally placed. It is also to be understood that the Agents' call for tenders should not be confined to the United Kingdom but should extend to all important markets in which favourable terms may be obtained.

8. As regards the last part of the Dewan's minute of 1st February 1913, the requirements of the case can perhaps be covered by instructing the agents to arrange for railing the stores from the port to Depot in Mysore and also to insure against all risks which can be done on the payment of a small premium.

Sd/- J. S. Chakravarti,
Financial Secretary to Government.

Bangalore,

Under Secy for Rys
Govt. of Mysore

Further note on the purchase of English Stores for Railways being remarks on the Comptroller's note dated 15th February 1913 on the same subject.

*****

COMPTROLLER'S PARA 1. It is quite true that I assumed that the Madras and S.M.Ry.Co., would charge us 10% supervision charges, in addition to book rates. This rate is levied even on stores issued privately to home line employes and it was therefore assumed the rate would also be levied on stores issued to a foreign railway.

PARA 2 (a). This is merely a statement of opinion, but one I am quite prepared to agree to, with the proviso that ~~set~~ stores obtained through the Company will not cost us any more than stores obtained direct from home. I would however point out that Messrs. Rendel & Tritton (late Robertson) are the Consulting Engineers for the Madras and S.M. Ry.Co., so that if that firm were employed direct by us, the passing and inspection of the stores would be in the same hands in either case.

PARA 2 (b). As pointed out in the Dewan's forwarding note, this para is based on a wrong premise, but in any case, as indi-cated above, the original source of supply would be the same in each case. I do not agree that a responsible firm of home agents would consider their connection with the supplies had ceased after the stores had been received. They would be far too jealous of their reputation to run any avoidable risk of stores not being according to specification.

PARA 2 (c). I do not understand what is meant by the advantages of a local firm to look after our interests. If it means having some one in Madras to see to the landing and clearing of goods, I would point out that the M. & S.M.Ry. Co., do not do this themselves through their own - -

Store keeper as most railways do, but employ agents, and we coul of course employ the same agents.

In July last soon after I joined this appointment, I asked the Agent if I might draw on his stores for anything tha might be available on the usual terms and he replied in the affirmative. The usual terms would be book rates plus ten per cent. This source would therefore be available to us in any case.

PARA 2 (d) As regards rates, there are so many manufacturing firm at home in every business, and rates are cut so fine, that we need not fear any difficulty on this score. It is merely a matter of credit and I should think, a well known English firm of Consulting Engineers calling for tenders for the Mysore Sta would receive equally favourable tenders as if they called for tenders for the Madras and Southern Mahratta Railway Company.

There would, of course, be 3 weeks' delay in accepting tenders as they would have to be sent out here which would be avoided if the Madras and Southern Mahratta Railway Company's Board of Directors decided which tenders should be accepted.

PARA 2 (e). We should get the concession rate for freight in any case. I am getting it now on all stores locally ordered such as pumps, tanks etc.

PARA 2 (f). I do not propose to maintain large Store Depots. It is true railway stores have a tendency to grow, but it is one of the functions of the Audit Department to watch this carefully and draw attention to any ~~as~~ seemingly unnecessary - - increase.

In any case, I do not ~~or~~ suppose the Madras and Southe Mahratta Railway Company will get out any stores for us for which they have not received payment in advance and whether they hold them or whether we hold them would appear to be immaterial from the point of view of suspense balances.

I quite agree it is worth while to try and arrange with the Madras and S.M.Ry.Co., for the supply of construction - stores. Personally, the cost being equal or even nearly equal I would prefer to use the Madras and S.M.Ry.Co. rather than utilize a new method which might break down at a critical time.

For instance, for lines in the Shimoga or Chitaldrug District, Marmugao would probably be a better port than Madras and we should have to ~~have~~ make arrangements there for an Agent to do our work in the one case, whereas the Madras and S.M.Ry.Co., would perform the work in the other.

PARA 4. I have said before we get the freight concession in any case and that being so, I think even 5% is too high, but we might keep an open mind on this matter till we hear the Company's views.

PARA 5. Of all the three methods of obtaining English stores, I think the method of employing a firm in India is the least desirable. All these firms are agents for one particular English firm and any order given to the Indian firm would go direct to that English firm without any question.

For instance, any order placed with Messrs. Martin & Co,. would merely be forwarded on to Messrs. Hudson & Co., of Leeds By this means one is debarred from the keen competition that exists among the various manufacturers in England which competition enables the buyer to obtain his supplies at the lowest prices.

Still more important in my opinion is the question of inspection during manufacture. The only guarantee of good workmanship in the case of stores imported through firms in India is the maker's name.

I venture to think that if an Indian firm tried to appoint their own inspectors at home, the English firm would very soon

place their agency business elsewhere, and that no Indian firm would care to run the risk. Thier business as agents is to boom their English firm out here and to try and make purchasers believe their particular firm is the best etc., etc.

PARA 6. As stated before I quite agree that, given suitable terms, the best method is to employ the Madras and Southern Mahratta Railway Company but, next to that, I would unhesitatingly place the appointment of agents at home.

PARA 7. No remarks.

PARA 8. Damage between f.o.b. and delivery at port is usually covered by insurance. The risk of damage after unloading at port to destination is very small and is, in India uniformly, I think, run by the owners of the goods themselves. I have never heard of any serious damage being done to stores except in the case of defective packing and this is generally recoverable from the supplying firm at home who will always meet a bona fide claim of this nature rather than let their reputation suffer.

Sd/- E.A.S.BELL,
Secretary for Railways,
Government of Mysore.

Bangalore,
18th March 1913.

22/1/14

Under Secretary for Railways,
Government of Mysore.

Note on the question of the best method of procuring English Stores required for railway work.

******

The most economical and advantageous method of procuring English Stores for the new Railway Construction Department requires careful consideration.

The most important items are:-

I. Permanent way.
II. Girders.
III. Rolling stock.

Of these, it is now possible to get the first two manufactured in India,

I by the Tata Iron & Steel Works,
II by several firms in Calcutta and Bombay.

As regards Rolling Stock this can also be obtained through - - certain firms in Calcutta and Bombay who would merely act as Agents and import the stock from Europe and charge commission thereon. This then represents one method of procuring English Stores, ordinary tools and plant of English manufacture being also purchased from time to time as required from firms in this country.

Another method would be to arrange with the Madras and Southern Mahratta Railway Company to get all English Stores for us, drawing on their balances for whatever might be available and allowing them to send home indents for special purposes such as the large items mentioned above. It is not however certain that they will allow us to utilize their stores, and in any case the usual supervision charge of 10% ad valorem would be levied.

The third way would be to have regular agents in England, preferably a firm of Engineers who would draw up specifications, inspect stores during the process of manufacture, pass them and arrange for their shipment. The principal Engineering firms who go in for this class of business for Indian Railway Companies are:-

Messrs. Rendel & Robertson who are Consulting Engineers for 7 Companies' lines and all the State lines.

Mr. Robert White, Consulting Engineer for 2 Companies' lines.

Sir John Wolfe Barry and
Messrs Berry & Leslie, who each have 1 railway.

These people would probably charge a commission and possibly ask for an office allowance in addition. It will however probably prove cheaper and it would I think be as well to write and ask these firms on what terms they would undertake the business. It might perhaps be as well for this to be done through the existing Stores Division with a suspense budget. This is the procedure followed in the Gwalior State but it has the disadvantage so far as railway stores are concerned that the concession rates for freight usual on railway stores will not be allowed by the Railway Companies from the port of importation to the Depôt.

In connection with the first proposal of buying European Stores in this country, the question of inspection of permanent way manufactured by Messrs. Tata & Co., arises. It is believed the Railway Board intend to ~~lars~~ place large orders for steel rails and possibly also "fastenings" with Messrs. Tata and Co., and which will, of course, have to be inspected. The Railway Board already have an establishment at Calcutta and Bombay for the inspection of local manufactures and presumably the inspection of steel rails will be undertaken also by this

organisation. It is believed also that these inspectors are allowed to work for Companies' lines on a certain fixed scale of commission and I would recommend that the Resident be asked to ascertain if the Railway Board would permit the Mysore Durbar to make use of whatever means the Railway Board use to have their orders placed with Tata probably inspected and passed.

Sd/- E.A.S.BELL,
Engineer-in-Chief,
Mysore State Ry. Construction.

S. W. File No. 182 of 1913.

Serial No.

In offl No. 16
P W D
Dated 24th January 1914

I agree with the Secretary for Railway that all stores and materials for D.P.W. works may be got inspected and passed by a Firm of Consulting Engineers of established reputation.

The same Firm that is recommended for Railway may also be employed by the D.P.W. In fact the Government may engage this Firm for drawing up specifications, superviging, manufacture and inspecting and testing materials before shipment.

The following papers are now placed on the file by this office as desired by the Financial Secretary:-

(1) A letter addressed by Mr.George A.Goodwin to the Dewan Saheb on the same subject.

(2) Extract from a letter addressed by the late Mr.Houston Stewart to Mr.McHutchin in March 1903, showing the arrangement that was in existence on a previous occasion.

M J Smith
Offg: Secretary to Government,
P.W.Department.

Bangalore,
31st January 1914.

To

The Chief Electrical Engineer
to the Government of Mysore.

NOTE—Contn. sheet.

GPB—60,000—7-11-13

E. O. D. O. 40/[illegible]

I am in agreement with the suggestion that all stores and materials excepting those of special nature (such as electrical appliances, which are best handled by the Electrical Depart--ment), be purchased on specifications by a res--ponsible firm of experienced consulting engin--eers and that all such stores be carefully ins--pected (and tested when necessary) and passed by that firm.

2. My only suggestion is the powers that are proposed to be vested in such a firm are in--adequate; for, the acceptance or rejection of tenders for such materials should rest with the engineers without the necessity of referring them to India for approval. My reason for this re--mark is based upon experience that, owing to market fluctuations, a supplier is able to give the purchaser the benefit of an existing low rate for immediate acceptance, whereas, if the rate quoted must hold good for either a short or long period, the supplier must add to that rate suf--ficient to cover himself, should the market rise in the meantime. This is particularly true in respect to steel, iron, copper and similar pro--ducts, and by the employment of a live purchas--ing agency, the savings to Govt. resulting from purchases at the most advantageous rates should, under ordinary circumstances, more than cover the fees which Govt. would have to pay them.

3. The Electrical Department consumes a con--siderable quantity of iron in various forms,

The file relates to the appointment of Agents for the purchase of materials from England and foreign countries. So far, the question has been considered by the Railway Secretary, the P.W. Secretary, and the Chief Electrical Engineer; but they have all dealt with it from an engineering point of view, and recommended the employment of a Firm of Consulting Engineers. I am in agreement with the opinions expressed in the various notes; but there is another aspect of the question, and that is the purchase of miscellaneous stores required by the several Departments of Government, such as the Medical Department, the Stationery Office, the Education Department, and so forth. In times of great engineering activity like the present, the expenditure on engineering stores is very much greater than that on miscellaneous stores; but in normal times, I assume that the latter are relatively much more important than at present.

The India Store Department subdivides its work somewhat minutely, and has special Officers who are considered experts in purchasing particular classes of stores. Its purchases amount to several million pounds a year, and it can elaborate to an extent utterly impossible in the case of the Mysore Government.

I believe the best method of dealing

with the stores required by the Mysore Government will be to appoint a special Agent on a fixed salary to deal with all indents, and he should place all orders employing expert and technical assistance whenever necessary. As I have no information regarding the average annual value of the stores required, it is not possible for me to suggest a detailed scheme. But if there is to be a Conference as suggested in the Financial Secretary's note, the information might be got ready before the Conference and a scheme roughly outlined. Each of the self-governing Colonies has its own local Agent in London, and I think a somewhat similar arrangement will be convenient in the case of the Mysore State. There are, I presume, many other matters which have to be dealt with in London besides the supply of stores, for which it will be convenient to have an Agent on the spot.

Fl. Mis File No. 1279 of 1914.

Serial No.

OFFICE NOTE.

SUBJECT:- Appointment of an agent in England for the inspection of plant or material purchased by the Mysore Government from time to time and other work on behalf of the State.

REFERENCE:- Two notes by the Dewan dated the 21st July 1914 desiring that the Secretary, Public Works Department and the Secretary for Railways should consider the question in consultation with Messrs. Tata and Sons and also put up a suitable reply to an application from - - - - Mr.Edward C.St.John, M.I.E.E., Queen Anne's Chambers, Westminister, offering his services in connection with the agency.

As there was some previous correspondence on the subject, the papers relating thereto were called for from the Financial Secretary so that this office may be able to deal with the question as a whole. These papers are now received with Assistant Financial Secretary's D.O. No. Fl.1116 dated the 7th September 1914.

2. The question discussed in the previous correspondence referred to, is given in the

NOTE—Contn. sheet.

1212

GPB—3,000—17-12-14

Serial No.

and Revenue Secretariat Office Notes, pages 1 to 22. In short, it is as follows:-

Some applications for the agency have been received by the Dewan, he desired (in his note dated the 18th December 1913) the Financial Secretary to put up a note on the subject in consultation - - with the Railway Secretary, the P.W.Secretary, - - Mr.Beames and Mr.Chatterton, as large quantities of material had to be imported in connection with the Railways, Public Works and Electric installations. The Dewan also indicated that the firm to be appointed for the purpose might obtain tenders and send them for approval and that they should be responsible - - that the goods are sent out according to specifications, &c., given and that they are landed in proper condition.

The Financial Secretary circulated the - - papers to the officers mentioned above and stated that after studying the question they would meet and formulate proposals. The Railway Secretary stated -- that it was not advantageous to employ such firms as Messrs. Edward Le Bas and Co., who were General Merchants, or the Railway and Works Company who - - were contractors - these were the firms who applied for the agency. He was of opinion that a firm of Consulting Engineers, such as Messrs. Rendel Palmer and Tritton, should be appointed as specifications and designs had to be drawn up, supplies during manufacture and after completion inspected, &c.

The Public Works Secretary [illegible]

Railway Secretary that all stores and materials for D.P.W. works might be got inspected and passed by a firm of Consulting Engineers of established reputation.

The Chief Electrical Engineer was in agreement with the suggestion that all stores and materials excepting those of special nature (such as electrical appliances which were best handled by the Electrical Department) be purchased on specifications by a responsible firm of experienced Consulting Engineers and that all such stores be carefully inspected (and tested when necessary) and passed by that firm. He was, however, of opinion that the acceptance or rejection of tenders for such materials should rest with the Engineers without the necessity of referring them to India for approval.

The Director of Industries and Commerce stated that he was in agreement with the opinions expressed by the several officers from an engineering point of view but there was another aspect of the question and that was the purchase of miscellaneous stores required by the several Departments of Government, such as the Medical Department, the Stationery office, the Education Department and so forth. He favoured the appointment of a special agent on a fixed salary and said that the matter might be discussed in a Conference.

3. The last opinion of Mr.Chatterton was received on the 10th March 1914 and no further action seems

Further action was taken in Fl. Mis 1279 but the papers were not sent to No. 7 by 28/2

to have been taken so far. A subsequent application received from Mr.J.F.Crosdell, Engineer and Export Merchant, London, was forwarded to the Financial Secretariat with this office No. 1161/5944 dated the 18th June 1914. This has not been placed in the file.

Mr.Rangaiya)

4. Mr.L.Hutchin, the late Chief Engineer of the State had offered to do all inspection work for a salary of Rs 250 per month. His letter is probably in the Railway Secretariat.

The suggestion of Mr.Chatterton that the agent employed should be one who can undertake - - inspection of general stores, such as Medical, - - - Educational, &c., is impracticable. We cannot get an expert who can test the quality of all sorts of materials.

To mix up general and miscellaneous stores with Engineering stores will mean that the inspection of either will not be conducted according to proper standards. The General Stores may therefore be - - left alone for the present and the Engineering - - Stores alone considered since their value far - - - exceeds that of any other stores. The necessity for agency does not exist in the case of other stores.

being 1754

17 The foregoing note of the Assistant Secretray Finance has been written under my instructions and represents my views.

18 As regards the Railway stores, the Railway Secretary at first favoured the idea of appointing agents in England under the impression that arrangements through the Madras & Southern Mahratta Railway Company would be too costly, in the way of commission. On my pointing out the advantages of getting stores through the M.& S. M. Railway Company and explaining that the arrangements might not be after all as costly as considered by the Railway Secretary, enquiries were made from the Company with the result that very satisfactory and economic arrangements have been arrived at by which we get our Railway stores through the M.& S. M. Railway Company. The Company have got as their agents one of the best firms of consulting Engineers --- in fact, the very

Europe

firm which the Railway Secretary recommended to Government for appointment in the first instance---- so that we could get the services of that firm as well as the guarantee of the M.S.M. Railway company as regards the quality of stores for the 2½ % commission that we pay. If we had appointed the firm direct we would still have to pay 2½ % commission. It will thus be seen that the method of obtaining railway stores has been very satisfactorily settled and does not require any alteration. As regards the Electrical Electric department the Chief Engineer says that that his department alone can arrange to obtain Electrical appliances. Moreover, as much of our electric stores and appliances is obtained from America it is doubtful whether the appointment of a firm of consulting Engineers in England as Agents will be of material help in the matter of obtaining Electrical stores. As regards the stores required for the Public Works Department, the Public Works Secretary is in favour of appointing an agent. He does not, however, recommend any particular firm. Much of the stores required by the Public Works Department is of a miscellaneous nature and I am doubtful how far a firm of Consulting Engineers of high repute would be useful or suitable for making purchases for the ordinary stores of the Public Works Department.

19 On Mr. Mr. Chatterton's suggestion an attempt was made to get the statistics of the value of the stores used by all departments of the State and to treat the case comprehensively. But the statistics

NOTE—Contn. sheet.

GPB—25,000—22-3-15

Serial No.

called for from the several departments were slow to come. The Public Works Secretary also thinks that it is impracticable to combine general and miscellaneous Stores with the Engineering Stores in a single agency. The file is therefore submitted to the Dewan Saheb with reference to the requirements of the Railway, Electrical and Public Works Departments only.

20 In short, as the matter of Railway stores has been satisfactorily settled otherwise and as the question of Electrical Departmental stores is not likely to be satisfactorily solved by appointing agents in England alone, it is hardly necessary to employ a firm of consulting Engineers as the general agents of the Mysore Government for the supply of Engineering Stores. On each occasion when stores of considerable value have to be ordered arrangements may be made with a firm of consulting Engineers to inspect and pass the articles.

21 If, however, Government decide to appoint agents, the conditions stated in the Assistant Secretary's note may be imposed to avoid embarrassment and difficulty in our dealing with agents.

Issue Card ks 7.7.15

To Messrs Tata Sons & Co., Bombay

No. H. 65 dt 8th July 1915

(Later that the Mysore Govt intend appointing in London an agent for purchasing P.W.D. Rly stores & doing their business on terms stated and enquires whether their London agent can take up the agency and if so, on what terms

From Messrs Tata Sons & Co.

Letters dt 18.8.1915 & 7.9.15

Inform that the firm's London agents are agreeable to take up the agency on the following terms.

1) A yearly payment of £500 to cover office rent, clerical labour &c., instead of the clerical services offered at the expense of the Govt.

2) Commission @ 1½ percent on the total

NOTE—Contn. sheet.

GPB—25,000—22-3-15

Serial No.

value of the orders placed on the agency provided that the Govt guarantees a minimum annual commission of £300, but on purely banking transactions the rate would be one quarter %-

3) All cable & out of pocket expenses should in addn to the above be charged by Govt.

4) The above or accepted terms are liable to revision yearly

8.9.15

The London Agents of Messrs Tata Sons Viz Messrs Tata Ltd are prepared to accept the agency on the following terms :-

(1) 500 £ to be paid for office rent, Clerical Assistance etc instead of the par gone Clerk proposed by Govt

(2) 1½% Commission on all transactions with a fixed minimum payment of 300 £. In the case of mere banking transactions i.e. transactions involving payment or receipt of Money Commission is the only one fourth %

(3) Cable Charges & other out of pocket Expenses to be Charged to the Number

NOTE—Contn. sheet.

GPB—25,000—22-3-15

19

Serial No.

(4) The terms be tentative for one year.

29) The rate of commission asked for viz 1½% does not seem to be high. But to give the minimum of 300£, purchases to the total value of 20,000£ or 3 lakhs of rupees will have to be made through this Agency. Seeing that Ry materials will be got through the S.P. Ry and Electrical Deptt Materials departmentally from America, it is doubtful if we can always count on sales to this minimum & tentative. ~~Until~~ ~~so long as the C.P. Works Contract~~ Banking transactions through the Agency will be 'nil' as the State Bankers of the State Messrs Conlis & Co will do all banking work gratis.

30) The fixed payment of 500 £ for rent, clerks etc plus actual out of pocket expenses. Cablegram charges etc may amount to a very large sum.

31) Perhaps 3% Commission on the value of goods purchased. Without anything for out of pocket expenses. Clerical assistance etc may be Cheaper & more desirable.

Respectfully/

32. It would certainly be advantageous for the State to have agents in London of the status of Messrs Tatas Limited. That would fit in very well with the idea of the Industries & Commerce Committee to have Trade representatives in important centres.

33. But the terms asked for by Messrs Tatas, viz involve the payt of £800 per annum at the least i.e. Rs 12,000. This is besides out-of-pocket expenses for inspection work &c. From this I infer that in the case of Railway stores &c if Tatas employ Consulting Engineers to inspect stores we shall have to pay fees &c in addition.

34 The attached statement shows the payments we have made for purchases out of India during the last ~~five~~ four years i.e. ~~1911-12~~ to 1914-15. As Railway materials are now being obtained through the M.S.M.Co on convenient terms & as most of the Electric stores come from America I think the residual amount of foreign purchases* hardly justifies such costly agency arrangements as is referred to above.

22/9

35. The Council wants this info to be obtained Vide para 24 above

22/9

*The normal amount is about £10,000 as will be seen from 1911-12 figures. The figures for subsequent years include special items on account of Kanpur bridge works &c.

III. London Agent for the purchase of Stores.

Brief summary of discussion. It was argued that the appointment of an Agent for the purchase of - - stores required for all the Departments of the State would be unworkable and that as the Departments - - purchasing stores to any very large extent had already made satisfactory arrangements by which they got what they wanted, the appointment of a London

Agent was not necessary. It was also stated that as distinct from the appointment of an Agent, the appointment of Consulting Engineers to inspect and pass stores, etc., for our Railways would perhaps be necessary later on, but even here the present arrangement of getting our Railway stores through the Madras and Southern Mahratta Railway Company was quite satisfactory and economical.

RESOLUTION.- The present arrangement may continue in the case of the Railway Department.

Appointment of Messrs Tata and Sons as London Agents

As desired by Dewan

I discussed with Mr. Padsha the question of appointing Messrs Tata and Sons as the London Agents of the Mysore Govt. They seem to have opened a Branch in London which purchases all the materials required for the Iron works and also the Hydro-Electric works. The Branch is able to furnish information as to when an order is likely to be executed - a most important matter in the case of large works and also obtain for us any commercial information that may be required. In my opinion it would be very useful to have an agency of this sort in London especially as we propose to start some large commercial concern in which the State will have substantial interest. Such an agency will be useful especially when we have products such as sandalwood oil &c to place on the market

Exclusive of the Dy

NOTE—Contn. sheet.

dept the purchases in other depts come up to 8 or 10 lakhs of rupees per annum there are purchased through local agents but there can be no doubt that if we had proper ~~local~~ London agents we can arrange a better system in connection with the workshop.

I would therefore suggest that the question of appointing persons Sale and Loan Agents which has been ordered to lie over till the year is over be reopened

The terms asked for by them viz £500 for office establishment charges &c and 1½ p.c commission on all transactions with a fixed minimum payment of £300 together with cable charges and out of pocket expenses are no doubt somewhat high and it is doubtful whether until we make our own independent arrangement for the purchase of railway stores we could give them sufficient work but at any rate the help that they can render

Flag F
decided in Council

NOTE—Contn. sheet.

GPB—70,000—17-12-15

Serial No.

and my objections were on the previous occasions based on the rather high amount of remuneration demanded. The special reasons why I now support the proposal is are

(a) We shall be operating on a large scale in the London market as regards sandal oil and very useful information can be got from reliable London agents to check rates &c.

(b) Light or narrow gauge Ry materials may be got through the agents. We need not & are not getting such materials thro' M. S. M. Ry Co

(c) Even as regards Electric Deptt & other stores which we may obtain elsewhere we may get rates checked by the agents. At present though we deal with high class firms there is practically no checking of rates.

(d) The agents will be particularly helpful in large industrial undertakings & investigations like Iron & Steel, Paper &c and will be able to secure the services of suitable experts.

(e) The disturbed conditions of trades & industries at the present time renders it desirable that we should get as much sound advice as possible regarding our big purchases & sales.

(f) The agents will help us in creating markets for Mysore products such as timber &c.

I agree with the Financial Secretary.

There is no doubt that it will be useful for the State to have a reliable and experienced firm as the Tatas as our London agents. The volume of business to be transacted in Europe for the State is likely to increase rapidly and the services of a London firm should therefore be secured.

Please bring up at a meeting of Council.

London 12th December 19 13

Dear Sir

My friend Mr Silvestre of the Bureau of Commerce & Industries who has lately returned from India tells me that your Government frequently purchase ngineering materials from England & has given me permission to write you ith his introduction.

If you at any time should require the services of a Consulting and Inspecting Engineer on this side or to act as your Agent for the purchase of materials I should be very pleased to render you my services.

I am a Mechanical Engineer of large experience & have been in practice for over 25 years, acting for many Municipalities, Firms, Companies, Mines etc in our Colonies & abroad . Amongst the various Works I have had the charge of I may mention the following; Locomotives, Carriages & General Rolling stock for Railways, (both standard gauge & light Railways) Permanent Way, Signals, Railway, Road & Suspension Bridges, Water Works Plant, and accessories, Electric Light & Power Machinery, Pipes & Aqueducts, Cranes, Engines (Steam, Gas & Oil) Boilers, Mine & Colliery Machinery, Municipal work generally etc.

The last large contract I had charge of was for the Rand Water Board in the Transvaal & consisted of four engines (for pumping)Boilers, Steel Chimneys, and Mains, the capacity of which is 500,000 gallons of water per hour raised 900 feet ~~EXXXXXXX~~ & this installation now holds the Worlds record for economy & efficiency.

I pay special attention to the question of packing (which is not usually done) & by carefully arranging & grouping of the separate parts I have often saved my Clients large sums of money , in some cases as much as my fees, by

- Do choose attention to the question of "Is it a motor" criterion.

- In the case of the "Motor" criterion - "Engine or the motion to Turbo - Mano alter ...

- Do not [illegible] [illegible] [illegible]

reason of the packages going out under DEAD WEIGHT rates & not by MEASUREMEBT RATES%

On receipt of your enquiries I would be pleased to invite tenders from the most suitable Firms & send them out to you with my recommendation for your examination & selection & on receipt of your instructions would place the orders. After this I would take up the Professional work of Inspection during the whole time of manufacture & test everything possible before it is shipped. I have Assistants all over the Country & who would when necessary visit the Works daily ,while I make it a practice to const--antly go round the Country so as to keep everything under my own personal observation & control.

My fees for the duties above described would be 3 per cent on the value of the work delivered in India C.I.F.

I am a Member of the Institution of Civil Engineers & Past President of the Society of Engineers.

If you should favour me with your confidence I take it that with all orders you would arrange at the same time for some London Bank to make payment to me in exchange for the shipping documents & my account

Trusting to have the pleasure of hearing from you

I remain

Dear Sir

Kitterick, Woking,

Dated 7th March 1903.

Dear Mr.Mc Hutchin,

I have to thank you for your letter of 22nd January.

That it was a little disappointment to me, after 20 years' connection with your State, I must frankly admit.

You refer to an interview which I had with you when you were last in England; and I fear that, on that occasion I must have given you a wrong impression as to the value which I have always attached to the position which I have so long held with your State. Let me explain. When an arrangement was first made with me in 1883 two separate rates of remuneration were agreed upon, viz.,

For permanent Way Materials 2½ per cent.
For rolling stock and other equipments 3½ per cent.

In 1893 an all round rate of 2 per cent was agreed upon, as it was anticipated that indents would chiefly for large lots of Permanent Way Materials and Water Mains and this rate has been in operation up to present time.

In course of time, the work of the Sanitary Department, under Mr.Standish Lee, became included in general arrangement, and indents for this Department were often of so unimportant a character that the duty of inspection, in various parts of the country, was sometimes a source of expense out of all proportion to the remuneration received.

It was to this feature of the position that I ventured to refer when last we met; and what was in my mi was that it would be equitable to arrange two rates, one for indents above and one for indents below, a certain su

I am sorry if I conveyed to you anything beyond this, I note, with regret, what you say as to the future.

The policy of making a general contractor responsible (in the case of water supply schemes) for the whole work, including pipes,&c., trenching and laying has a good deal in its favor. Though I fear on balance you will find it more costly. In the case, however, of your State Railway Department, the same course could not well be adopted owing to the necessity for qualified inspectio of all ~~in all~~ Railway materials.

I see that chiefly owing to the action of the India Office, you do not anticipate much Railway work by your State in the future, but I hope this may not mean that the subject is entirely at an end.

I do not think the India Office wishes to discourage Railway construction by Native States, from their own resources, though I am aware, that they are in favour of such schemes being, as far as possible, carried out through the agency of existing lines.

If the occasion should arise, I hope you may yet see your way to make use of me in this connection. have had a very long experience in every branch of the subject.

I had hoped that the Arsikere-Mangalore Line, or so much of it as lies within your State, would probably be undertaken by your Railway Department and perhaps also the system of 2'-6" Gauge Feeder Lines in connection with which I furnished a good deal of information to Mr.Molloy.

You are good enough to ask whether your Government is in my debt for any services not yet dealt with. No! The account with the Railway Department was balanced to a point in October 1899, while as regards the General Works Division there is a small balance in hand here, of £ 13-4-7 as shown in statement of account No.30 G dated 11th March 1902.

Perhaps you will kindly let me know your wishes as to the disposal of this sum.

I hope you found the sluices for the Harikanave Dam quite successful?

The Turbine Pumping Plant will I fear always be a source of trouble unless the water is freed from sand.

In that case I was instructed to invite a design and estimate from Messrs Appleby and others. Messrs Appleby's design was selected without reference to me.

May I offer you my cordial congratulations upon your engagement, which I have heard of from Harrington.

× × × × ×

Yours very truly,
(Sd) Houston Stewart.

No. F.L. 4718-67

Government of H.H.the Maharaja of Mysore,

General and Revenue Secretariat,

Dated Bangalore 13 April 1914.

M E M O R A N D U M.

Heads of Departments and Deputy Commissioners are requested to furnish Government the following information in the accompanying form in regard to foreign stores and articles obtained for their Departments or for local bodies under their control.

(1) Value of foreign stores and articles (i,e,articles manufactured out of India) obtained during each of the years 1910-11, 1911-12 and 1912-13.

(2) Nature of articles. (3) From what Firms obtained and whether tenders were called for. (4) Through what Agency obtained (5) Approximate value of foreign stores and articles expected to be obtained in 1913-14, 1914-15 & 1915-16. (6) Nature of article (7) From what Firms intended to be obtained and whether tender is to be called for. (8) Through what Agency to be obtained. (9) Remarks.

2. No minute classification is necessary in regard to the nature of the articles referred to in (2) and (6). It will be sufficient if one or two general headings are given under which all supplies to the Department can be grouped.

3. It will be sufficient if the actuals for past years are correct to the nearest even hundred of rupees. The estimates may be in even thousands of rupees.

M. Visweswaraya Esq., B.A., C.I.E., M.I.C.E.;
Dewan,
Government of Mysore,
Bangalore.

Sir,

Export Agency

I have the honour to enquire whether the Mysore Government have appointed an agent in this country to inspect and test any plant or material they may purchase in England from time to time. If not, I submit that my services would be of great value to you in this direction.

I am a fully-qualified Engineer - a member of the Institute of Electrical Engineers - and have only recently vacated my appointment as Chief Engineer to the Madras Electric Supply Corporation, which office I held for 7½ years, so that I am fully conversant with the special conditions attaching to Southern India.

For references, I would ask you to communicate with various members of the Government of Madras, and any of the

leading commercial houses or banks, to all of whom I am personally well-known.

Should you be disposed to further consider the matter, I would suggest a retaining fee and small commission based upon the average of five years purchases in this country.

I have the honour to be, Sir,

Your obedient servant,

M. Visweswaraya

PUBLIC WORKS SECRETARIAT.

Bangalore, 31st July 1914.

Dear Mr. Chakravarti,

The Dewan wishes that I should consider the question of appointing an Agent in England for the inspection of plant or material purchased from that country by the Mysore Government from time to time and submit a note in the matter. I therefore request that you will kindly send me the papers on the subject - - which were circulated among certain officers of the State some months ago. They were passed on to the - - Chief Electrical Engineer with this office Unofficial No. 16/P.W.D. dated the 31st January 1914 and I understand they were finally transmitted to the Financial Secretariat with the Director of Industries and - - - Commerce' No. 1698 dated the 13th March 1914.

Yours sincerely,

Ramachandra Rao

F. P. Baker & Co. Ltd
MANG DIRECTOR: L.H. VIDAL. MAJOR I.A. RETD

485, Bond Court,
Wallbrook,
London, E.C.
(NEAR MANSION HOUSE)

October, 1914.

Dear Sir,

Since 1865 this Firm has dealt with a Clientèle, almost exclusively Indian; while members of the Firm have resided in India, thus having an intimate and personal knowledge of India, and all Indian requirements.

The Firm has not advertised and has always pursued a steady old-fashioned method of quiet but efficient service.

Its enormous growth of late years has been due entirely to personal recommendations among satisfied Clients. Nevertheless it has been so often suggested to the Firm that a little publicity of their methods of business would be of very real help to Residents in India and abroad.

It is this suggestion, so often made by their Clients, that has decided them to send this letter. Full particulars of our methods and terms of business will be sent with pleasure on application.

Briefly, their method is to enable Clients to buy direct from the best Manufacturers and Wholesale Houses at the lowest English trade prices, thus saving considerable retail profits. The Firm works on a low and definite buying commission of 5%, it is prepared to send by return post, illustrated catalogues, samples, patterns, and quotations of the latest articles on the market. They will also purchase and despatch by the cheapest and quickest methods possible. Clients at home on leave or on retirement can personally select their requirements on the Firm's introductions at the wholesale Show-rooms, where they can see the largest possible Stocks of all the latest articles.

A list of some of the articles they are frequently supplying is attached. Clients' enquiries will be very much appreciated and answered fully and promptly, while if already a Client, the Firm would very much appreciate your recommendation to friends.

Yours faithfully,

F. P. BAKER & CO., LTD.

P.S.—During the present National Crisis manufacturers and employers of labour naturally look to Shippers of standing to help them by every means possible to ward off unemployment, and the closing of factories this winter. Orders would therefore be greatly appreciated at home, while there would be very real economy in many instances to Clients.

THE following comprise some of the Articles we are constantly supplying to Clients at an Appreciable Saving of Expense :—

Ordinary Requirements.

Trunks, Bags and Suit Cases.
Field Glasses, Binoculars and Telescopes.
Dressing Cases, fitted or unfitted.
Watches, Clocks or Barometers.
Silverware of all kinds.
Jewellery.
Challenge Cups and Prizes.

LIEBER'S
A. B. C. (5TH EDITION)
BUSINESS TELEGRAPH CODE.

Bangalore, 6th March 1915.
(Mysore. India.)

The Secretary to Government,

In the Financial Branch,

Bangalore.

Sir,

Referring to your No. F.L/4718-67 dated 13th April 1914, and subsequent reminders on the subject, I have the honour to attach herewith a statement of materials (with value) received for use in this department (not including those which were ordered for and received for other departments of Government) from 1910 - 1911 to end of February 1915.

Regarding the statement of estimated value of materials required for use in this department, during the year 1915-1916, we ~~request~~ regret to state that it is not possible to submit it now even to the nearest thousands, as, after our present IV Installa-tion works are completed, our Plant will be completely changed and it is not possible to forecast at present the nature of the materials that would then be required for use.

I have the honour to be,

Sir,

Your most obedient servant,

S. Saunders

Offg. Chief Electrical Engineer
to the Govt. of Mysore.

BR-MPH.

GLASGOW, 23rd April 1915.

H.H. Sree Krishnaraja Wadiyar, Bahadur, G.C.S.I.
Maharaja of Mysore,

M Y S O R E.

Dear Sir,

We take the liberty of offering you our services as buying Agents in this country for the purchase of any Machinery, etc. that you require to import from Great Britain.

We have for the past seventy years made a specialty of the export of all classes of Machinery for plantation and also for manufacturing purposes and would be glad if you would give us an opportunity of tendering for any of the requirements of your State.

We have on our Staff practical Engineers who would be able to inspect any Machinery or other goods ordered by you and see that same was in first class order before allowing it to be shipped. We would purchase the goods for you in the cheapest possible market consistent with the quality required by you and,

and would charge only a buying commission of 2½% on our nett total outlay for our trouble in the matter. We would also look after shipment, Insurance, etc. and send you complete documents for any shipment made direct or through your Bankers if you so prefer.

We trust you will give our proposal your consideration and thanking you very much in anticipation,

We are,

Yours faithfully,

HENDRY BROTHERS, LIMITED.

Dear Sir,

MYSORE GOVERNMENT AGENCY.

Some eighteen months ago we had some correspondence with our friends in Bombay, who were in communication with you regarding the question of this firm acting as Agents to your Government in London for your European business.

We venture again to draw your attention to this question as we hear from Mr. B.J. Padshah, who is now in London, that the matter is virtually settled.

We would also like to take advantage of this opportunity to enquire, if we are privileged to act as your European Agents, whether we would be given the whole of the Mysore Government business or only part thereof.

It has come to our notice recently that you are setting up a wood distilling installation,

9th May 1917.

The Financial Secretary,

to the Government of H.H. the Maharajah of Mysore,

BANGALORE.

Dear Sir,

INDORE GOVERNMENT AGENCY.

Some eighteen months ago we had some correspondence with our friends in Bombay, who were in communication with you regarding the question of this firm acting as Agents to your Government in London for your European business.

We venture again to draw your attention to this question as we hear from L. B.J. Pedahan, who is now in London, that the matter is virtually settled.

We would also like to take advantage of this opportunity to enquire, if we are privileged to act as your European Agents, whether we would be given the whole of the Mysore Government business or only part thereof.

It has come to our notice recently that you are setting up a wood distilling installation,

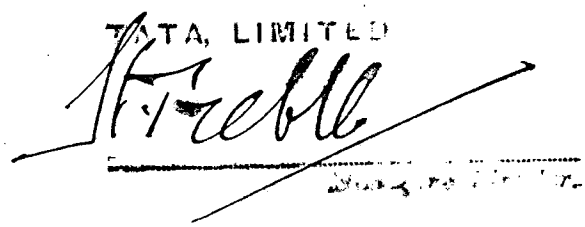
and it has occurred to us that we might offer our services in connection with the sale of the products and further, we might be useful to you in disposing of your sandalwood oil and similar articles.

We need hardly assure you of our best services in any direction in which you may call upon us in the event of your confirming our appointment as your Agents.

We are,

Yours faithfully,

TATA, LIMITED



and it has occurred to us that we might offer our services in connection with the sale of the products and further, we might be useful to you in disposing of your sandalwood oil and similar articles.

We need hardly assure you of our best services in any direction in which you may call upon us in the event of your confirming our appointment as your Agents.

We are,

Yours faithfully.

Dewan Bahadur J. S. Chakravarti Esqr.,M. A.,F.R.A.S.,
Financial Secretary to the Government of
H. H. The Maharajah of Mysore,
Bangalore.

Dear Sir,

We beg to acknowledge receipt of your letter No.FL65 of the 9th instant, enquiring whether our Agents in London can conveniently take up Agency work on behalf of the Mysore Durbar, and if so, on what terms.

In reply we beg to state that Messrs. Tata, Limited, who represent us in London will be very glad to take up the Agency, as they are well equipped for this particular kind of work; but as regards the terms etc we shall have to refer the matter to them, which we are doing by this mail. We shall,therefore, be.obliged if the Mysore Durbar will be so good as to wait till we have Messrs. Tata, Limited's views, when we shall be in a position to make an offer which we hope will be acceptable to your Government.

Yours faithfully,
Tata Sons &

B A N G A L O R E .

Dear Sir,

In continuation of our No. M.139/15 of the 13/14th June, we beg to inform you that we have received a wire from Messrs. Tata Limited, as to the terms on which they will take up Agency work on behalf of the Durbar.

As against the Durbar's proposal to allow a clerk, our friends suggest a yearly payment of £500/- to cover office rent, clerical labour, etc., as no single clerk can satisfactorily deal with the various questions or enquiries that the Durbar might send forward. According to our friends proposals, each enquiry of the Durbar will be distributed in Tata Ltd's office to the Department most conversant with the subject which system we have no doubt you will agree will give best results.

As regards commission, our friends propose to charge 1½% (one and a half per cent) on the total value of all orders they may place for you on the understanding that the Durbar guarantees a minimum of £300/- per annum in such commission to Messrs. Tata Ltd.

On purely banking transactions, however, i.e., on payments made or moneys received on behalf of the Durbar, they will charge only ¼ (one quarter) per cent.

All cables and out-of-pocket expenses shall be debited to the Durbar as actually incurred.

We have already made it clear to our friends that the Agency will mean their only doing such work as is referred to them and that the Durbar will be quite free to transact business in any case through them or otherwise as it may seem proper to the Durbar.

Messrs. Tata Ltd further state that they are writing to us upon the subject and we will again address you upon receipt of their letter.

In the meanwhile, we shall be glad to know if the proposed terms are acceptable to the Durbar.

Yours faithfully,

for Tata Sons Ltd.

M.154/15

The Financial Secretary,
to the Govt. of H.H. The Maharajah of Mysore,
Bangalore.

Dear Sir,

In continuation of our letter No.M.151 of the 18th instant, we beg to advise that we have now received a letter from Messrs. Tata, Limited, London, dated 10th August, confirming the cable which they sent to us regarding the terms for Agency business, on the basis of which we wrote to you our last letter. Our friends state that they found it difficult to decide as to what terms should be offered in the absence of exact particulars as to the scope and extent of the requirements of your Government, although they realized fully that your Government itself would experience some little trouble in enumerating all items of probable work, which would be placed before them. They remark that it is their hope and desire to take up Agency business such as offered by you, and in mentioning the terms which we have already communicated to you, they have been most anxious not to make them too onerous. At the same time, it is to be recognized that we do not know the extent and scope of the business, that your Government does not propose to pay fees for mere enquiries, and that your Government reserves to itself the right to work through other Agents, if it thought proper to do

do so. It is, therefore, to protect themselves in some measure that Messrs. Tata, Limited have asked for a minimum commission of £.300/- over and above the fixed sum of £.500/- for office allowance, covering usual items of rent, staff, lighting, stationery, postage etc. The commission on orders placed would be 1½% and the commission on purely banking transactions such as the payment or transfer of monies etc, where no further labour is involved, would be ¼%. In addition to the above, all expenses on cables and out-of-pocket expenses for inspection work etc would be charged for separately. This arrangement, Messrs. Tata,Ltd.,point out, would be more advantageous to both your State and themselves as both parties would be assured that the actual sums expended only would be charged. We have no doubt that you will see the reasonableness of paying the cable charges, because, if, as you state,no fee is payable for mere enquiries, our London office would necessarily have to incur such expenses on enquiries which would otherwise have to be borne by themselves.

We quote the following concluding paragraph from their letter for your information :-

> "It seems to us that even these terms should be revised yearly, when we are better acquainted with the class of work entrusted to us.... We need hardly assure you that such work as is entrusted to us by the Mysore Government will receive our most careful attention."

We now await your wishes,

Yours faithfully,

...
